THE MINDSET AND ACTIONS OF A CYBER LEADER

The aim of this worksheet is to get you thinking about what and how a cyber leader thinks, what they post and comment, what sort of persona and things they create, and what sort of things a cyber leader does in the real world.

Your task is to reflect and come up with four practical answers for each heading. Get as creative as you'd like, but make sure your answers are always practical and able to be implemented. By the the end of this worksheet, you will have begun to reflect on the mutli dimensional side of a cyber leader and hopefully can begin to implement some of these into your lives.
